About WorkNet Pinellas

WorkNet Pinellas came into existence in January 2001 under the general direction of Pinellas County and Workforce Florida, Inc. (WFI) which is the state's chief workforce policy organization. Created by the Workforce Innovation Act of 2000, the public-private partnership supports and promotes economic growth through workforce development. Workforce Florida is the principal architect in the state's efforts to develop and retain a highly competitive workforce responsive to the needs of employers.

The Situation.

WorkNet Pinellas needed a Web solution that would provide important data to those seeking Pinellas County employment information. The site also had to address the needs of three key groups in the Pinellas labor market: the unemployed, local employers and students preparing for the workforce. An information-rich site, ease-of-navigation was also an important development consideration.

The Solution.

DataGlyphics worked with WorkNet Pinellas to build the premier site for people seeking employment information and assistance in Pinellas County. Online services for **job seekers** include: job listings, unemployment information, salary and labor market statistics, links to job banks, access to local, state and national labor markets, and more. For **employers** the site provides information on: applicants, recruiting, incentive programs, tax credits, youth programs, and more. DataGlyphics provides continuing development, hosting and managed services for WorkNet Pinellas.
